

BAGONG BUTUANON!

Team 4: Butuanon River Improvers

Our vision for Butuanon River is for it to be a public open space where citizens can bike, take a stroll or have community gatherings. There will be strategically placed commercial areas to cater to these users. We imagine riverside cafes, hawker food stalls, bike shops, art galleries, and health and fitness studios.

By making the space a usable space for the community, the cleanliness and maintenance of the river, now not only give ecological benefits, but potential monetary benefits as well. We are expanding the circle of stakeholders who stand to benefit from the long term health of the river, at the same time we are giving the city some much needed open space.

For the rehabilitation of Butuanon river, we realize that it is not enough to organize community clean-ups or to simply provide waste receptacles. It is not enough to rely on good-natured citizens to slowly rehabilitate the river.

- There is a lack of awareness of existing projects & programs
- There is a lack of motivation to act
- There is a lack of collaboration within the community

Stakeholders

- Private Corporations
- Barangays
- Average Citizens
- Low-income citizens
- Riverside communities

Pilot Location

Butuanon Viewing Deck
Ibabao-Estancia, Mandaue City
Total Area: 126 sqm.

Short Term Plans

Campaign to spark interest & investment in River

1. Creation of a New Committee within the Mandaue City Hall
2. Create a Marketing Campaign
3. LGUs, Different Departments, maintain relations with the Civic Society (CS) Committee and ensure that they update CS with relevant information and projects.

Medium Term Plans

Research and Acquisition of materials for Improved green spaces, namely Butuanon Viewing Deck.

- The CPDO will canvas and acquire the garbage receptacles and materials for the pay-to-use restrooms and kiosks for the Butuanon Viewing Deck.

Long Term Plans

1. Construction and boosting of Modified Butuanon Viewing Deck
2. Operation of Modified Butuanon Viewing Deck
3. LGUs and Departments must continue to update the CS Committee on the progress of their projects such as changes in water quality, further progress on green spaces developments.
4. Modification to other Green Spaces
5. Optional: Implementation of Green spaces in more areas.
