Keywords: Floods have been done. Flood mapping, vulnerability

share your talent. move the world.

Challenges urban climate (change): Netherlands

examples of problems in the urban areas: flooding, degradation of waterways, heatstress, drought leading to lower groundwater table and subsidence with results as damage of buildings

Boogaard F.C. Climate adaptation from Groningen to Mae Phanom. Inaugural speech on Spatial Transformations – Water, ISBN 9789081935692 Kenniscentrum NoorderRuimte/Hanzehogeschool, Groningen, February 2016.

Mapping

- Flooding
- Heatstress
- Drought
- Damage (cost)
- Subsidence
- Pollution
- Waterquality
- (im)mobility
- Opinion (social media)
- etc

Brasil, Rio de Janeiro

Groningen, NL

Thailand, Bangkok

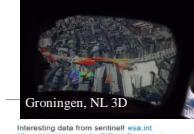

The aim of a Floodmap Bergen (Norway) is to be used as

the first step of a flood risk management

in the city of Bergen (Norway).

Bergen, Norway

Groningen, NL 3D

Denmark, Copenhagen

Taiwan, Tainan

Floodmodel Amsterdam: verification

3D flood visualisation: Norway

Example: Europe Copenhagen (appr. 150 mm/h)

Cloudburst in Copenhagen July 2011

The economy of adapting!

Damages over the next 100 year

Sea:	2-3 bil Euro
Rain:	2-3 bil Euro
Total:	4-7 bil Euro

Adaptation measures

Sea:	500 mil Euro
Rain:	800 mil - 1 bil Euro
Total:	1.3 - 1.6 bil Euro

We save:
2.6 - 3.2 bil Euro.

July 2011 - damages

- More than 150 mm rain within 2 hours
- More than 1 billion euros
- Damage to critical infrastructure
- Thousands of households evacuated
- Emergency services strained

From Floodmap to Climateproof city approach
Multifunctional and space for water

- Mapping flooding/heatstress
- Buildings
 - Roofs
 - Green buildings
- Squares
 - Open areas
 - Playgrounds
- Roads
 - Road surface
 - Road storage
 - Near roads
- Green
 - parks
 - Little green

From maps to solutions: masterclasses

Step 1 strategy; Step 2 long term solution; Step 3 implementation

SERIOUS GAMING

Take home messages

- We can map our shared challenges
- (innovative) validation of maps is needed
- From Big Data maps to solutions is the real challenge
 - Masterclasses climateproof cities
 - Use international knowledge exchange tools and projects as INXCES
- Implement long term integral strategies
